In this site, you will have the opportunity to bathe and relax in the Polques Hot Springs. Box lunch. Then visit the Green Lagoon, an impressive aquatic mirror that resembles a giant emerald with a particular brightness in the mornings and afternoons; its color is due to the high magnesium content in the water. Near this lagoon is the *Licancabur Volcano* (5,868 meters above sea level). We will then stop at the Red Lagoon, which is very impressive because of its red color, due to the fine sediment accumulation of the same color on the surface, as well as the pigmentation of a certain type of seaweed.
