

M/C CORMORANT GALAPAGOS CRUISE

5 DAYS / 4 NIGHTS

Climb aboard the Cormorant Galapagos Cruise for an incredible 5-day adventure! Every day on the Cormorant is specifically designed to enhance your Galapagos experience. Daily excursions consist of snorkeling with colorful marine species, hiking to panoramic vistas, and wildlife spotting on the various islands. When you're not busy getting to know the exotic land of the Galapagos, relax in the various social areas, soak in the onboard jacuzzi, lay out on the sun deck, or rejuvenate on your private balcony (featured in every one of the spacious cabins). This cruise is a perfect combination of adventure and comfort, ideal for solo travelers, couples, or even small families.

Note: This is a tour extension and must be combined with one of our full package (6 nights minimum) tours. All itineraries can be combined, perfect for travelers looking for a longer Galapagos cruise. Please contact a travel consultant about adding a custom Ecuador travel package to this extension.

ITINERARY 5-DAY CRUISE

Day 1

ARRIVAL & BACHAS BEACH

Saturday

Upon arrival, transfer to the yacht, where you can settle your belongings, meet your new cruise mates, and get acquainted with the ships facilities.

In the afternoon, visit Bachas Beach. Located on the north shore of Santa Cruz, Bachas Beach is a fantastic spot to swim. While you're here, you may notice the few remnants of US World War II, as a floating pier presents itself on the shores.

Day 2

PINNACLE ROCK & SULLIVAN BAY

Sunday

To start your morning off right, visit the iconic Pinnacle Rock on Bartholomew Island. Marvel at the extinct volcanic formations that make up the island. Then, hike a trail of stairs to the summit of the volcano, until you reach one of the best views of the islands.

In the afternoon, visit Sullivan Bay. This island is covered by Pahoehoe lava. Patterns of vegetation that were burned after the eruption are imprinted around the landing. Visiting in the afternoon is ideal because the temperature will be more pleasant, and the light will be optimal for photographs.

Day 3

SOUTH PLAZA ISLAND & SANTA FE ISLAND

Monday

Head to South Plaza Island in the morning. This small island is covered by Opuntia cacti and is home to one of the largest sea lion populations. You can also find colonies of yellow and red iguanas here.

Later, visit Santa Fe Island, and hike along one of the two visitor trails. One will lead you to a panoramic viewpoint atop a cliff and the other will bring you to a small beach and a prickly pear forest. Feel free to go swimming here or try to spot the sub-species of land iguanas.

Day 4

WITCH HILL & PITT POINT

Tuesday

Visit Witch Hill in the morning, and relax on one of the nicest beaches in the Galapagos. The soft, white sand invites you to take a stroll along the shore, and the turquoise waters tempt you to snorkel beneath their surface. You can find colonies of sea lions and blue-footed boobies nearby, as this area is bustling with life.

In the afternoon, head to Pitt Point. While here, hike until you reach a nesting site for three species of Galapagos boobies. This is an excellent spot to take photographs of natural beauty. Then, learn about the volcanic formations that make up the land that brought you to this wonderful site.

Day 5

LOBOS ISLAND & DEPARTURE

Wednesday

Before leaving the Galapagos Islands, check out Lobos Island. Spend a moment marveling at the beautifully colored plants in the area, and the massive amount of sea lions that call this island home. You might also see some shore birds and marine iguanas.

Then, bid farewell to the friends you've made aboard the Cormorant and head to the airport for your flight to your next destination!
