ITINERARY 5-DAY CRUISE

Day 1

ARRIVAL & BARTHOLOMEW ISLAND

Tuesday

Arrive in the Galapagos and transfer to the Ocean Spray Catamaran. Once aboard, you will be shown your cabin where you can relax on your private balcony before meeting your new mates at the welcome briefing and lunch.

In the afternoon, head to Bartholomew Island for your first Galapagos adventure. Bartholomew Island is famous for Pinnacle Rock, a volcanic cone formed by magma from an underwater volcano. This enormous rock has been featured in movies and is a photographers dream. While here, visit the small beach nearby, where green sea turtles live, and penguins gather. If you're in the mood, dip into the water full of colorful fish, for an afternoon swim.

Day 2

DARWIN BAY & EL BARRANCO

Wednesday

Follow your guide to Genovesa Island, also known as "Bird Island" due to its wide variety of birds. Once here, move to Darwin Bay, one of the few places where red-footed boobies can be guaranteed to be seen. A beautiful 200,000 red-footed boobies are estimated to be living in the greenery of Genovesa.

Later, head to El Barranco, better known as Prince Philip's Steps. This steep, rocky path leads up to a cliff that offers incredible views of the surrounding islands. You may also walk in the Palo Santo forest, home to nesting red-footed boobies and other bird species.

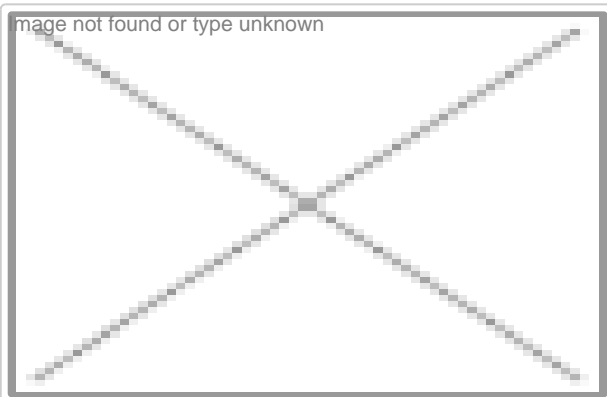

Day 3

SANTIAGO ISLAND, ESPUMILLA BEACH & EGAS PORT

Thursday

Today you will explore Santiago Island, the second island visited by Charles Darwin. This island is known for its ability to provide salt, water, and food for whalers and buccaneers passing through. Land iguanas once populated the island but now are extinct. From here, visit Buccaneer Cove, an excellent spot to snorkel. The underwater formations and vibrant varieties of fish gather below the surface.

In the afternoon, head to Egas Port, also known as James Bay. While here, look out for Galapagos lava lizards, fur seals, and the many tide pools that provide excellent snorkeling sites.

Day 4

NORTH SEYMOUR ISLAND & SANTA CRUZ

Friday

On your last full day, sail to North Seymour Island. There is a huge population of land iguanas, sea lions, blue-footed boobies, and frigatebirds here. Then, check out the Highlands. The Highlands of Santa Cruz is intriguing due to its present rich wildlife, hills, and volcanoes. Scope out the agricultural zones and watch for the amazing variety of birds flying overhead.

Day 5

MOSQUERA ISLET & DEPARTURE

Saturday

Unfortunately, today is your last day in the Galapagos. However, before you leave, visit Mosquera Islet. This islet hosts a reef of rocks and coral and a beautiful white sand beach. The perimeter is made up of lava rocks, and the island has one of the largest populations of sea lions, with an occasional sighting of orcas. After your visit, your Galapagos trip has officially come to an end. Head to the Baltra Airport for your flight to your next destination.
