## ITINERARY HIGH WATER SEASON, 3 NIGHTS ITINERARY

Day 1

### ARRIVAL IN IQUITOS

**Monday**

Meet your guide at Iquitos Airport and transfer by bus to Nauta. Embark on Delfin I and begin your navigation down Marañon River.

Take in the mesmerizing landscapes of the Amazon along the way while your guide introduces you to the nature, geography, and culture of the region.

Upon arrival at the cruise, meet your guides and the staff, who will follow you during your Peruvian Amazon journey.

## Day 2

### **JUNGLE HIKING & SWIMMING WITH THE DOLPHINS**

#### **Tuesday**

Wake up in the early morning to gain an unforgettable view of the animals that inhabit the Pacaya Samiria National Reserve, with all of its active and vast flora and fauna at its best.

After breakfast set out to explore Fundo Casual rainforest. Board a skiff and arrive on this non-flooded, or 'terra firme' forest. Later, go on a jungle trail and keep an eye open to spot native animals such as squirrel monkeys, sloths, parrots, and more.

In the afternoon, cruise through the Yanayacu and Pucate Rivers, peeking into different creeks and lagoons. Your expert guides will help you identify all the region's biodiversity. Go on a paddle board ride with chances of swimming in the jungle river along the famous and charismatic pink dolphins, an excursion exclusive to Delfin I.

## Day 3

### **CANOPY WALKWAY TOUR, KAYAKING & PIRANHA FISHING**

#### **Wednesday**

Rise early to go on a morning hike through a forest. Afterwards, head to a black water lagoon home to many 'piaches' or arapaimas, the largest freshwater fish in the world. Among the silence of the rainforest, you'll be able to hear the sound of these fish jumping out of the water to breathe.

Later, head to a private reserve where a 25-m (85-ft) high canopy walkway is located. This excursion is exclusive to Delfin I and it enables you to acquire a bird's eye look at the canopy, discovering the secrets of the rainforest that can only be appreciated from above.

In the afternoon, go kayaking and catch-and-release fishing at Nauta Caño Creek or Jacinto Lake. These places are inhabited by piranhas, small carnivorous fish.

Finish off your day with a guided night safari to look for nocturnal creatures such as caiman alligators, night birds like owls, and fishing bats.

## Day 4

### RETURN TO IQUITOS & VISIT TO CREA

#### Thursday

On your last day, visit an ancient Amazonian village called San Francisco. Visit a schoolhouse to meet the children and a market where it is possible to buy handicraft and souvenirs.

Visit the Amazonian Rescue Center (CREA), where manatees and other endangered animals are rescued and taken care of until they become healthy again and can go back to their natural habitat. You can feed these adorable marine mammals and help them recover as the staff explains you their condition as endangered species. The center accepts donations to keep up with the hard work they do to help the animals, so anybody willing to donate should feel free to do so.

Afterwards, your guide will join you to Iquitos Airport and offer you their assistance as you take a flight back home or to your next destination in Peru and South America.
